

Pt arrives to BUMC ED with  
Nontraumatic SAH

CT/CTA performed (repeat if poor quality?)  
or outside exam loaded into PACS

ED consults NSGY and requests  
admission with HMD

Patient admitted to 3T NICU by HMD  
using SAH supplemental order set

HMD consults Critical Care Service

HMD orders cerebral  
angiogram and  
possible embolization  
(IR arteriogram  
head/neck generic)

Neuro IR discusses  
with NSGY prior to  
procedure

Angiogram demonstrates  
aneurysm, AVM or AVF?

Yes

Continued management by NSGY, HMD,  
Critical Care

No

Neurology service is consulted by HMD for  
further management
