

Q1

What is your feedback on the asynchronous portion?  
3rd rock was a great resource to prime for scanning sessions

Q2

What is your feedback on the Sim lab?  
The US software was good practice before heading into the ED, especially for cardiac

Q3

What is your feedback on the quality assured scan portion?  
I liked QA because I was able to take that feedback and apply it to my next scanning session

Q4

What is your feedback on the Clinical Ultrasound Conference?  
I really enjoyed conference! I learned a lot from the journal article presentations

Q5

What is your overall feedback of the rotation?  
  
I really enjoyed this rotation. I feel confident using US and interpreting my images. I am so much more likely to reach for it on my clinical shifts instead of ordering a scan. I really appreciate how much time you invested in our learning and how open to our feedback you were!
